

ADVAN EDUCATION PROGRAM

2019 Courses and Workshops

www.advanimplantology.com

Nowadays dental practice requires specific skills that allow a valuable therapeutic proposal.

The knowledge and the ability to take advantage of the most innovative therapies, that means being able to carry out effective treatments finalized in a short time, must be always pursued, bringing back aesthetics and functional aspects at affordable costs.

The **EDUCATION 2019** training program is based on the Company experience and attention towards a modern, dynamic and proactive approach to dental practice.

We invite dental professionals to have our vision over dental implantology, where immediate load and peri-implant tissues stability are the keys to create new opportunities and high-end clinical results.

— Advan Educational Program at Vericat Training Institute

is partnering with

Advan is partnering with Vericat Training Institute for offering to our customers the courses of **Advan Education Program** at our international education center in Valencia (Spain).

The Vericat Training Institute has more than 15 years of well established experience for training programs at several levels, from basic to the very specialized regarding very advanced surgical techniques.

At our international education center we can deliver training for the most advanced and effective applications of our dental implant system, a specific focus regards the implantology with special attention to peri-implant tissues management and the immediate implantology (how

immediate placement and loading can be applied with predictable clinical results for a wide range of patients).

Near City of Arts and Science of Valencia, the Vericat Training Institute enjoys an excellent location in one of the most modern and bright areas of the city. This training center occupies 650 m² and is equipped with a conference room where the attendees can follow the surgeries live from the several screens of the classroom. It is modern emplacement for training at the highest level, with the aim of preparing the best professionals in the field of implantology, prosthetics and periodontics, the baseline of oral rehabilitation.

— WORKSHOPS with real patients

Justification and Objectives

Our events of scientific training aimed to train experienced doctors or newbie in oral surgery and dental implantology fields, especially, understanding the immediate implantology (immediate placement and loading) as a work philosophy and the managing of peri-implant tissues. Those are mostly practical courses with patients provided by the consultation itself.

The aim of the education program is to deliver the necessary theoretical knowledge and skills as well as allowing attendees to incorporate them into their daily dental practice in single, partial and total edentulism cases.

In order to achieve this goal, an eminently practical program has been designed. Attendees will be able to attend the visualization of live surgeries and even placing implants on patients. Also will be able to do the placement of fixed provisional prostheses on the same day of the implant surgery (for immediate load courses).
