## Direct Adhesive Restorations in Posterior Teeth: potential of composite materials in modern treatment plan

### SHORT ABSTRACT:

The purpose of the meeting is to provide an overview of current trends in conservative dentistry. Modern and increasingly advanced composite resin materials allow today to perform adhesive restorations respecting the shape, anatomy and function with remarkable results also from the aesthetic point of view  
Those will be some of the topics treated by the lecturer (preparation, cleansing, layering techniques, etc.)

### PROGRAM:

#### Direct Adhesive Restorations in posterior teeth

- The adhesive restoration in the modern restorative dentistry of the posterior quadrants: composite resins and enamel - dentine adhesives. Minimally invasive dentistry: microcavities and microrestorations, sealing.
- The direct and indirect posterior restorations in composite: Indications, when the direct, when the indirect.
- Composite direct restorations in posterior teeth

### LIVE:

- Practice by participants on artificial simulator

### Dr. Paolo FERRARI

He graduated in Dentistry and Dental Prosthodontics with honors from the University of Parma in 1988.
