Dr. Michele Lopez

**MICHELE LOPEZ** graduated in Medicine and Surgery at Università Cattolica del Sacro Cuore, Rome, in 1989, and obtained his specialisation in Odontostomatology in 1993. He is author of several scientific articles on prosthetics, implantology and regenerative methods.

He regularly gives lectures and presents at congresses in Italy and abroad, currently he is Oral Surgeon in UOS

TIORL of Campus Biomedico of Rome.

Professor in FACULTY OF MEDICINE AND SURGERY "A.GEMELLI" of the School of Specialization in Oral Catholic University of the Sacred Heart of Rome

He holds a patent for implant shapes and burs.

Dr. Lopez works in his private practice in Rome, exclusively in the area of reconstructive prosthetic surgery and implantology.

**PIER CARMINE PASSARELLI** Degree in Dentistry and Specialization in Oral Surgery from the Catholic University of the Sacred Heart.

Coordinator of the II Level Master in Basic and Advanced Implant Surgery and Implant Prosthetic Rehabilitation. Adjunct Professor of Oral Surgery, holder of integrated course Prof. A. D'Addona, Degree Course in Dentistry.

Adjunct Professor of Implantology, Degree Course in Dental Hygiene, Professor of Implantology, Master in Implant Surgery, Catholic University of the Sacred Heart. Adjunct Professor, Master in Osseointegrated Implantology, University of Rome La Sapienza. Coordinator of Advanced Bone Regeneration Course in Implantology on Anatomic Preparations, Catholic University of the Sacred Heart. Active Member, Italian Society of Oral Surgery.

Author of about 40 publications in international scientific journals with Impact Factor.

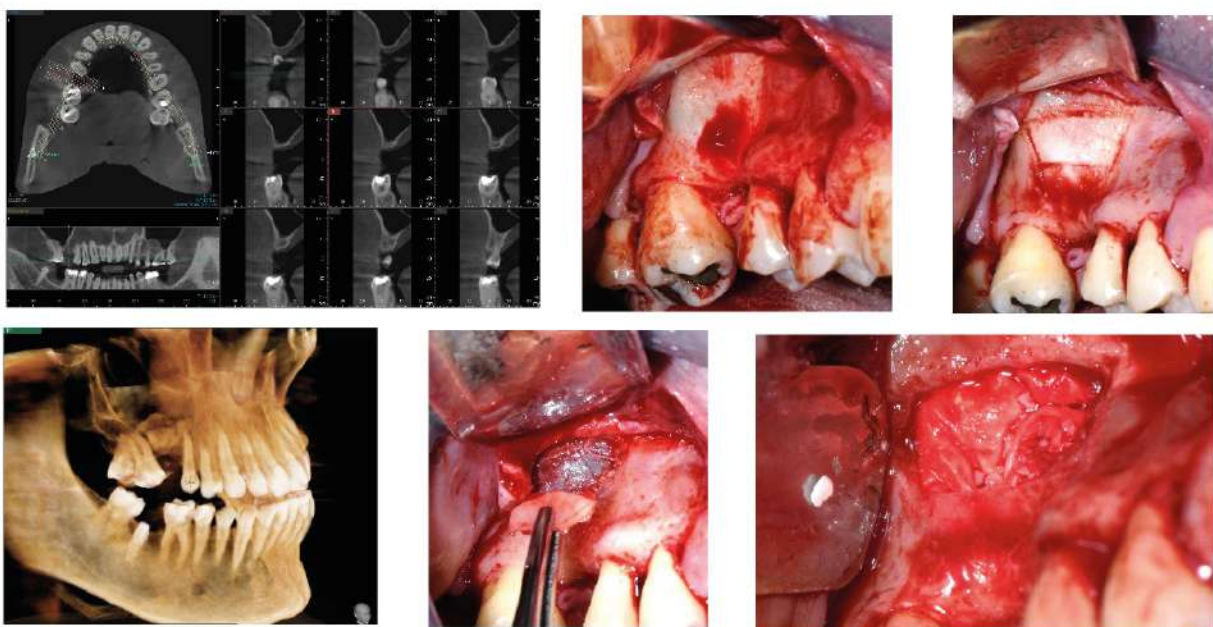

## ABSTRACT

Maxillary sinus lift is a surgical procedure suitable to restore vertical deficiencies of the posterior maxilla and can be executed either with a lateral or with a crestal approach.

One of the most important aspects of a bone regeneration is the stability of the graft. During the course the participant will be introduced to a new grafting technique for sinus lift with a lateral approach, which is called Sinus Pack Technique.

Sinus flow dynamic fluid technology associated with increasingly effective biomaterials, in paste or gel, finally allows a predictable and less invasive surgical approach in the crestal access of the maxillary sinus membrane elevation.

These new techniques have the advantage of being a minimally invasive and safe surgery procedures, with the same results as other sinus lift techniques.

## COURSE OBJECTIVES

Participants will be able to learn:

- Surgical anatomy overview
- Correct pre-operative planning approach
- Step by step surgical technique
- Proper grafting material selection and handling

## PROGRAM

09.00-11.00	How to approach and manage maxillary sinus
11.00-11.30	Coffe break
11.30-13.00	Surgical video sessions and comments
13.00-13.30	Lunch
13.30-15.30	Practice on models

## SPONSORS

**OsteoBiol**<sup>®</sup>  
by Tecnos

**ROEN**  
dental products

**medimpeks**  
d.o.o.

## DATE

December 11th 2021

## LOCATION

FOUR POINTS by SHERATON

Ljubljana Mons

Ravnikar hall

Pot za Brdom 4

1000 Ljubljana

Slovenija

## PARTICIPANTS

Max 25

## REGISTRATION FEE

Registration fee 200€

Vat not included
